

ANASTASIA TIKHONOVA

Frontend Developer

+31684753624 honu347@gmail.com www.linkedin.com/in/honu347 www.ihonu.nl Almere, Netherlands

SUMMARY

Frontend developer with a background in UX/UI design, focused on building visually appealing and user-friendly web applications. Committed to writing clean, reusable code following DRY principles to enhance maintainability. Passionate about delivering seamless user experiences while continuously learning new technologies and embracing challenges improving project outcomes.

EXPERIENCE

Frontend Developer

Klayr Labs

Utrecht

06/2024 - Present

- Built an Explorer for a Blockchain project in Next.js, handling complex data sets and enhancing user interaction through an optimised frontend.
- Implemented a flexible design system using Atomic Design Principles and set it up in Storybook, improving component reusability, documentation, and supporting collaboration across teams.
- Handled real-time blockchain data in a responsive UI, using TypeScript, custom hooks, and reusable functions for efficient state management, making the code scalable and easy to maintain.
- Collaborate with designers and backend developers to deliver a unified user experience and ensure a seamless, efficient web application environment.

Full Stack Developer Trainee

Hyf

Amsterdam

11/2023 - 04/2024

- Created and maintained user interfaces for web applications, ensuring they are user-friendly and aesthetically pleasing.
- Engineered backend systems using Node.js, Express, and MongoDB, optimised database queries, reduced API response time.
- Integrated frontend apps with backend using RESTful APIs to create functional full-stack applications.
- Used Jest for writing and running unit tests to ensure the reliability and functionality of the applications.

Low code Web Developer

Pavilion

Rostov-on-Don, RU

02/2019 - 01/2022

- Developed and maintained websites using low-code platforms such as Webflow, with custom CSS for advanced styling.
- Integrated e-commerce functionalities, including shopping carts and payment gateways.
- Implemented responsive web design techniques to ensure websites perform well on various devices.

PROJECTS

Forest Magique Ecommerce app

www.nextjs-webstore-three.vercel.app

- Made with Next.js, Stripe for payment options, including instant and cart-based transactions
- Sanity for CMS content management, incorporating custom fields and efficiently fetching data with GROQ

Coin Search React cryptocurrency market SPA

<https://stunning-cocada-99c314.netlify.app/>

- Frontend with Tailwind CSS and Daisy UI for responsive design
- Framer Motion for engaging animations and user interaction
- Integrated Chart.js to visualize historical coin prices
- Fetching data from CoinGecko API
